Project Description

This repository contains the complete project files uploaded from Google Drive.
The project archive includes all source code, datasets, configuration files, and supporting documentation required to understand, run, and modify the project.

Google Drive Source File:
The original project files were uploaded from the Drive link:
https://drive.google.com/file/d/1JmjSIztH8wJ0_Tuhq_newUhfJmfLuJJ3/view?usp=drive_link

📁 **Contents of the Project**

- Full project source code

- Required libraries and dependencies

- Executables / scripts

- Data files (if included)

- Documentation or reference materials

- Any additional resources needed for project execution

🚀 **How to Use**

1. Clone or download this repository.

2. Extract the project files if compressed.

3. Follow the setup or installation steps (if required).

4. Run the main program or scripts as described in the documentation.

📷 **Acknowledgements**

This repository is created to host and share the project in a clean and accessible format.
If the project includes third-party libraries, datasets, or other tools, the respective authors are acknowledged.
